## **I. Acknowledgement**

The internship opportunity I had on a clinical visit to a range of universities and hospitals in Japan was a great chance for learning and professional development. Therefore, I consider myself as a very lucky individual as I was provided with an opportunity to be a part of it.

Bearing in mind previous I am using this opportunity to express my deepest gratitude and special thanks to Dr. Chiung-Wen Kuo, who in spite of being extraordinarily busy with her duties, took time out to take and guide us to meet many wonderful staff and professionals in Japan who created favorable condition to us for observing and learning throughout the period of the visit. I also express my deep thanks to Taiwanese Ministry of Education for generous grant to support us.

I perceive as this opportunity as a big milestone in my career development. I will strive to use gained skills and knowledge in the best possible way, and I will continue to work on their improvement, in order to attain desired career objectives.

## II. Participants

Name	Position	
Prof. Chiung-Wen Kuo	Dean of Medical Imaging and Radiological Technology Department, Yuanpei University	Leader
Hoang, Pinchi	Student	Member
Lin, Shuhuei	Student	Member
Luan, Anjie	Student	Member
Yen, Chiching	Student	Member
Nguyen Hoang Minh	Student	Member
Chao, Yuju	Student	Member
Han, Haungyu	Student	Member

## III. Itinerary

Date	Activities
<b>10/10/2018</b>	<b>Arriving at Narita International airport, Japan</b>
<b>10/11/2018</b>	<b>Visiting Juntendo University Hospital and Gunma Paz University.</b>
<b>10/12/2018</b>	<b>Visiting Showa University, University Hospital</b>
<b>10/13/2018</b>	<b>Komazawa University</b>
<b>10/14/2018</b>	<b>Sightseeing</b>
<b>10/15/2018</b>	<b>Visiting Kanazawa Medical University and University Hospital</b>
<b>10/16/2018</b>	<b>Departing from Narita International airport, Japan to Taoyuan International airport, Taiwan</b>

## IV. Activity report

### 1. Juntendo University Hospital

In the morning on the first day of our journey, we were welcomed warmly by staff and professors in Juntendo University Hospital – high ranking hospital and university in Japan. The red banner was the representative of friendship and cooperation.

A technician enthusiastically showed how the CT scanner actually worked, which was fundamentally beneficial for five first-year students at their early stage on the road to master all medical imaging techniques.

The professors exchanged the symbolic items as to mark the new era of co-operation in education and culture in the near future.

We were invited to visit angiography interventional radiology faculty. The staff and students conducted some Q&A in terms of angiography interventional radiology.

## 2. Gunma Paz University

In the afternoon, we paid a visit to Gunma Paz University .

Prof. Chung-Wen Kuo made introduction of Yuanpei university to first-year Japanese students at Gunma Paz University by giving a presentation.

Apart from acquiring new technology and knowledge, students from both universities were encouraged to have an open talk at tea time

Ultrasound lesson was delivered to students in the practical ultrasound classroom. It was a good chance for first-year students to accumulate basic ultrasound principle under the guidance of an experienced professor.

In the next section, we moved to conventional X-ray room. The students were truly interested in how DR system performed.

The visit finished successfully.

### 3. Komazawa University

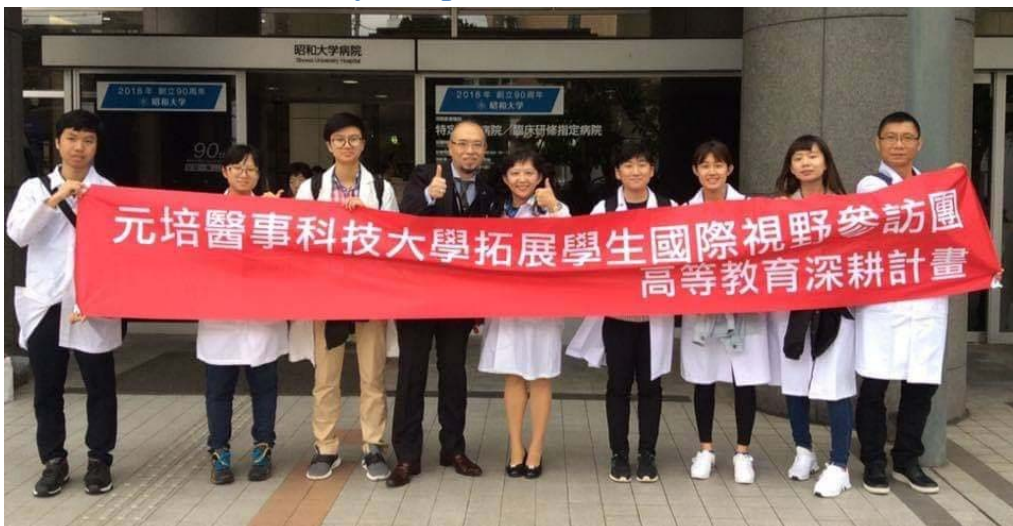

Visting the museum of Komazawa University. By doing so, we understood the establishment of this university.

Visiting library where a numerous number of research and materials were stored.

#### 4. Showa University Hospital

Our next destination was Showa University Hospital.

The students were allowed to observe the real X-ray room at the hospital. A technician was showing how X-ray machine works

The feast on the highest floor put an end to our visit, but the hospitality and enthusiasm of professors and staff at Showa University Hospital will extend to us.

## 5. Showa University

The next stop was Showa University

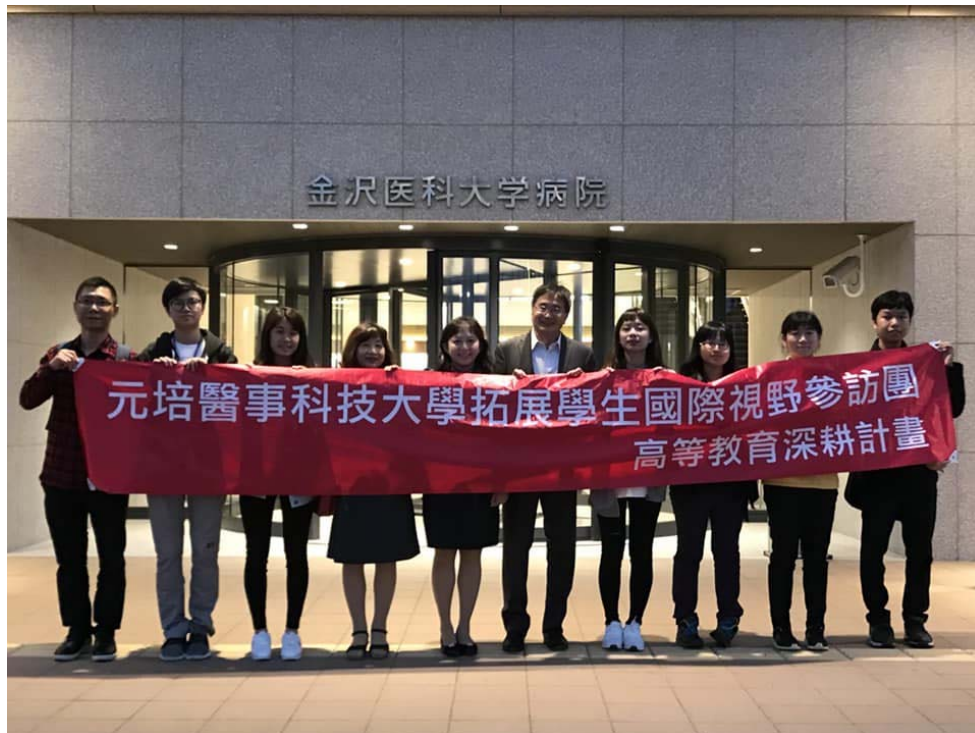

Thanks to the support of professors and some seniors, the first-year students could practice to use remote control to operate the ARC therapy machine.

The 3D- simulation of the ARC therapy machine gave students a great amount of astonishment and excitement. It was hoped that this would stimulate their passion about radiotherapy in the future.

#### 6. Kanazawa Medical University and University Hospital

The final stop was Kanazawa Medical University and University Hospital

The very interactive ultrasound lessons gave by an experienced doctor

The experienced technician instructed how to operate CT scanner step by step

The visit finished with the greeting of the president of Kanazawa Medical University hospital.

**THE END**
